

'Unrolla LM105

The LM105 is a little brother to the LX105 and replaces our popular SL350 bale feeder. Born out of necessity, bred with Hustler DNA, the new LM105 is 3-point-linkage and loader ready, but you'll need to pull a rope to disconnect. It has the toughest chain and bar setup on the market, and covered shafts just like its big brother to ensure long and faithful service without breaking the bank.

See the 60 Seconds of MiNT video about why we chose bearings

hustlerequipment.com/bearings

DUAL SIDE FEED

A single lever control enables feeding out to either side & precise rate of feed.

CONNECT EITHER END

Easily connecting from either end makes operation quicker and simpler in tight situations.

DUAL LATCHES

LARGE GUIDE CONES

FULLY-ENCLOSED FLOOR

The extra-slippery, solid polyethylene floor will not rust or corrode.

RHS BARS

4-5 times stronger than the competitors.

BEARINGS

Self-aligning, low maintenance bearings will easily outlast any type of bush system.

BALE CHAMBER

Steeper and deeper, it can hold and retain a variety of types of feed.

COVERED DRIVE SHAFTS

Keeps bearings clean, reducing maintenance and downtime.

PROTECTED MOTOR

BIS-ALLOY SPROCKETS

TOUGHEST CHAIN

Zinc-plated 12,000 lb chains with heavy duty rollers and pins are almost twice as strong as others.

TEETH

Unique, extra-strong shark teeth designed to prevent feed from being dragged under the machine.

INDIVIDUAL FEET

> Specifications subject to change without prior notice - check hustlerequipment.com for current specifications and options
> Some models not available in all territories, check with your local Hustler Field Consultant for availability in your country

'Unrolla LX105

Easier to use than any other type of chain feeder on the market today – nothing comes close to the LX105. Loaded with unique features that give more versatility and time savings and the ability to mount on 3PH, front loader, skid-steer or telehandler to give greater flexibility of use. Suitable for feeding out all but the tightest of round bales and baled silage, loose silage, maize, fodder-beet and more.

ENCLOSED FENCE

Ideal for loose feeds and working on steep terrain.

DUAL SIDE FEED

A single lever control enables feeding out to either side & precise rate of feed.

COVERED DRIVE SHAFTS

Prevents long chop hay or balage from wrapping around drive shafts.

BEARINGS

Self-aligning, low maintenance bearings will easily outlast any type of bush system.

BALE CHAMBER

Steeper and deeper, it can hold and retain a variety of types of food.

SNAPLOX AUTO-LATCH

This patented system lets you connect & disconnect without tugging a rope.

CONNECT EITHER END

Easily connecting from either end makes operation quicker and simpler in tight situations.

TOUGHEST CHAIN

Zinc-plated 12,000 lb chains with heavy duty rollers and pins are almost twice as strong as others.

TEETH

Unique, extra-strong 5cm shark teeth designed to prevent food from being dragged under the machine.
